

*Cumberland Christian School*

**Application for Honors Activity Addition to Transcript**

The Honors Diploma is designed to encourage students to perform at the highest level and demonstrate a clear readiness to successfully work at the college level. One factor that has frequently predicted success in college is involvement in activities outside of the classroom. Normal co-curricular activities are reflected on a student's transcript. The Honors Diploma provides a student the opportunity to receive recognition for additional achievement in activities outside of the classroom and school activities by making limited notations of individual achievement in outside activities.

Students working with the Honors Diploma must meet the academic requirements as well as participation in special individual activities. This form is the instrument to ask Cumberland Christian School to place particular individual special achievements on the official high school transcript.

All requests will be evaluated, but not all requests will be automatically added to the transcript. We are interested in presenting the student in the best possible light to interested colleges or employers, so we may be selective as to which activities will be placed on the transcript.

Christian Service Requirement activities will not be placed individually on the transcript.

1. Please describe the activity that you propose to be placed on the official transcript.

2. Is there a specific date and time at which the activity will be evaluated?

3. In what way do you believe this activity will enhance your transcript for a potential college or employer? Use the reverse side if necessary.
